

# General Meeting

January 19,2021

## Agenda

- I. Meet and greet new members and those we haven't seen in a while.
- II. Need a volunteer for Cruise Director.
- III. Love Your Boat Party
- IV. Guest speaker--Ruth Fitz of Cook Engine

Questions:

1) Diesel fuel systems: What diesel fuel conditioner do you recommend for this region (Hood River to Astoria) for winter storage and is a fuel conditioner needed during sailing season?

2) Diesel fuel systems: What are obvious signs that indicate a need for service or filter replacement?

3) Diesel Engine: Is there a reliable resource for cross referencing marine diesel engine parts vs ag motors. Example: How best to determine Injectors for Universal 25XP which is also Kubota 950?

4) Diesel Engine: Recommend best practices or check list to promote reliable operation?

5) Diesel Engine: How to determine remaining service life of motor? This question is academic but are there any obvious things that identify a tired motor?

6) Is there a way to check for flow in the exhaust elbow without removing it from the motor. How often should one expect to replace the elbow?

Other Questions?

- V. Thank you and goodbye.
